AFFINITY PHOTO PLUGIN SETUP GUIDE

Dehancer Film plugin for Affinity Photo

Affinity Photo plugin Setup Guide for macOS 2022-08-02

System Requirements (macOS)	3
Downloading and choosing the right package	4
Dehancer Film for Affinity Photo (macOS)	6
Recommended RAW settings	12
Application path and user data location	13

System Requirements (macOS)

Hardware requirements:

- Apple Macintosh, starting from middle 2012
- Metal-enabled GPU
- Optimised for Apple Silicon M1 / M1 Pro / M1 Max

Two dedicated distributives for Intel and for M1 are provided within the installation package.

Software compatibility:

- MacOS Mojave 10.14.5 or later
- Any current version of Affinity Photo that supports loading Adobe Photoshop plugins

Note: We do not officially support 'hackintosh,' virtual machines and other home-brew systems, while it could worth a try. Also, operation with hacked or modified host applications and OS is not guaranteed.

Downloading and choosing the right package

1. Make sure that your computer meets the **system requirements** for the plugin to work correctly.
2. Download the latest version of the plugin from **www.dehancer.com**

1. Press the button **Download and Get FREE Trial**.
2. Select **Ps / LrC / C1 / APh** as the Host Application.
3. Select **Dehancer Film Ps / LrC / C1 / APh plugin** as the Product.
4. Check the **Operating System** selection.
5. Hit **Download** button.
Your download will start automatically.

3. Unzip the downloaded zip file, if your system didn't do it automatically:

DehancerPsLrInstaller_v1.0.0				
Name	Date Modified	Size	Kind	
DehancerLightroomInstaller_arm64_v1.0.0.app	17 November 2021, 13:37	75,7 MB	Application	
DehancerLightroomInstaller_x86_64_v1.0.0.app	17 November 2021, 13:37	78,1 MB	Application	
DehancerPhotoshopInstaller_arm64_v1.0.0.app	17 November 2021, 13:37	75,5 MB	Application	
DehancerPhotoshopInstaller_x86_64_v1.0.0.app	17 November 2021, 13:37	77,9 MB	Application	
PLEASE READ BEFORE INSTALLATION.TXT	10 November 2021, 22:12	938 bytes	Plain Text	

4.

ATTENTION!
The Adobe Photoshop plugin is used for Affinity Photo installation

Intel-based macs:

Use the **x86** Dehancer plugin installation file.

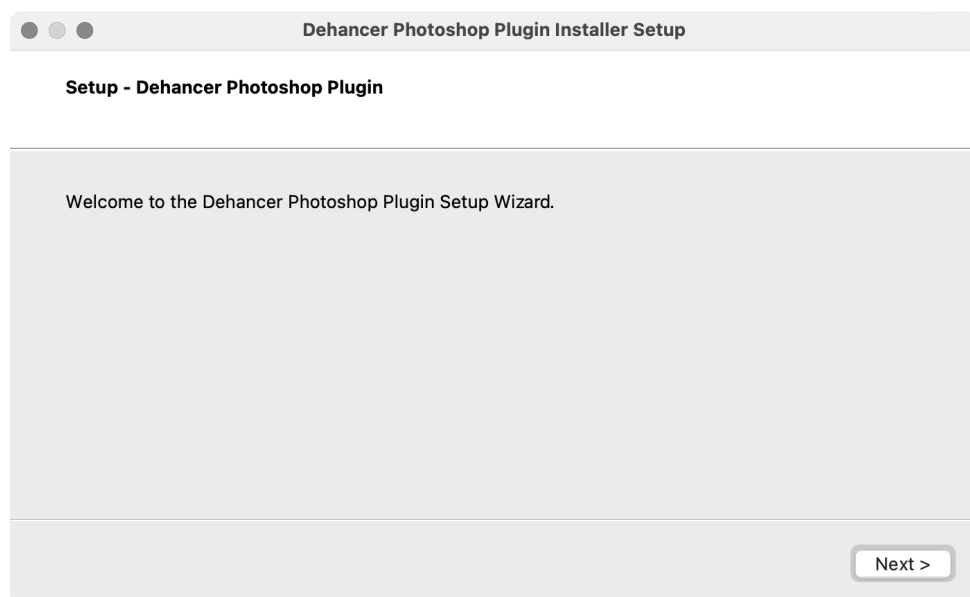

Apple Silicon M1/M2 macs:

On Apple Silicon macs Affinity Photo must be launched in **Rosetta x86 emulation mode** to run Dehancer plugin properly.

To do this, open the Applications folder, look for the Affinity Photo subfolder, locate Affinity Photo.app and select 'Get Info' from the right-click menu (or press Cmd + I).

Enable the '**Open with Rosetta**' option and use the **x86 Dehancer plugin** installation file.

5. Run the **Photoshop** installation file and follow the installation steps.

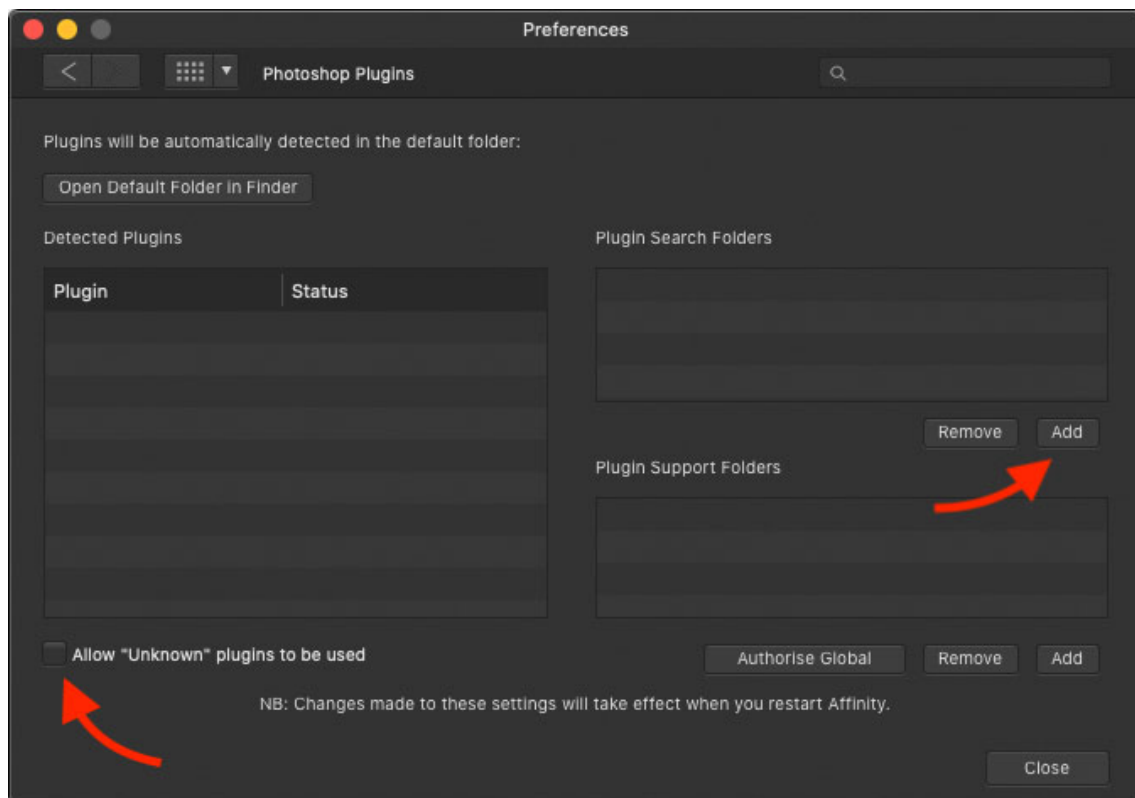

Dehancer Film for Affinity Photo (macOS)

6. Launch **Affinity Photo**. If the program was already running, you don't need to restart it.

7. Open Affinity Photo plugins preferences:

Affinity Photo → **Preferences** → **Photoshop Plugins**

8. Click the **Add** button under the **Plugin Search Folders** list and specify the installed Dehancer Photoshop plugin location:

Macintosh HD/Library/Application Support/Adobe/Plug-Ins/CC/Dehancer

9. Enable the checkbox **Allow "Unknown" plugins to be used**

10. **Close** Preferences and **restart Affinity Photo** as required.

11. After the application is restarted, a new plugin should appear in the list:

Filters → Plugins → Dehancer → Dehancer Film

Note that your image must be presented in the **sRGB color space** to be displayed and processed properly. Support for other color spaces will be added later.

[Recommended Color Settings for Dehancer Ps/LrC](#)

12. At first launch, the Settings window will open automatically. You can also open the Settings at any time by clicking on the gear icon in the toolbar.

13. Use the button **Update Film Profiles** to download the profiles the first time.

14. Now Dehancer is ready to use.

15. To remove the watermark, buy the License or **get the free 2-week trial on our website.** The License will be automatically sent to your account email and displayed in your User Profile as well.

Each License contains Activation Keys for two workstations (seats). Each Key activates both plugins – Adobe Photoshop and Adobe Lightroom.

16. Launch the Activation widget.

17. There are two options available:

Login and select License

1. Login with your Dehancer account.

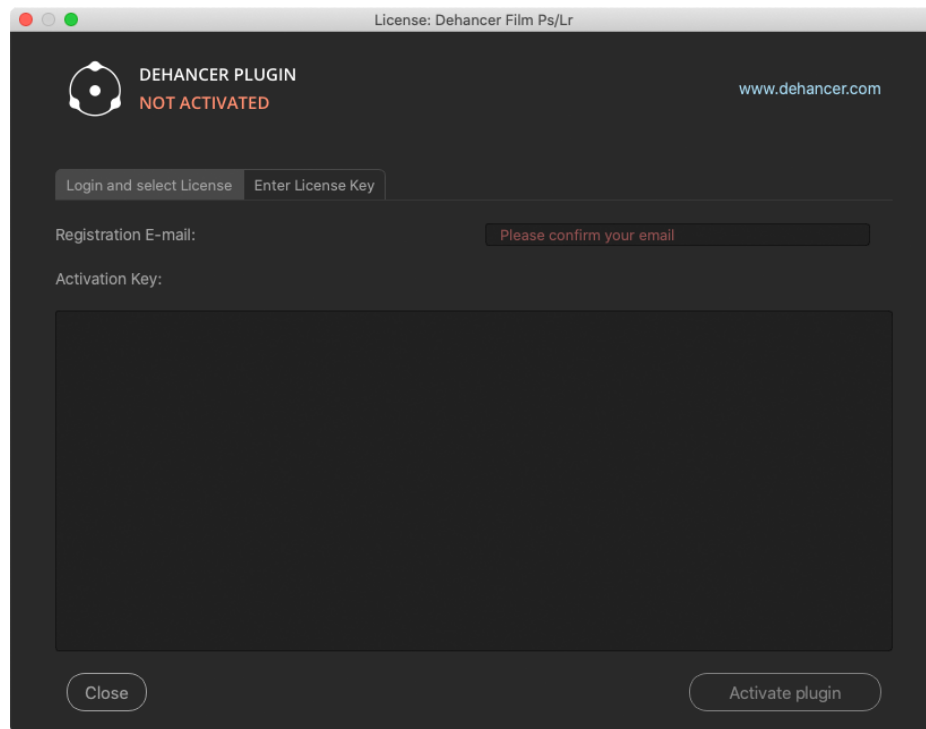

2. You will be presented with a list of Licenses available for your product. Select a Seat from the list, then press **Activate plugin**:

Enter License Key

Paste your registration e-mail and Activation Key from the letter you've received after purchasing the License. Press **Activate plugin**.

18. Enjoy!

Please Notice:

1. Internet connection is required for Activation.
2. Activation via Login doesn't work with Beta Licenses.
- 3. Please don't forget to Deactivate from within the plugin interface BEFORE selling your computer, migrating or reinstalling the System.**

Recommended RAW settings

While developing RAW photos in Affinity Photo, we recommend:

- Correct the most severe deviations in exposure and white balance
- Use the linear contrast curve if possible, avoiding clipping in shadows and highlights
- Disable noise reduction and sharpening
- Avoid any local enhancements which might cause visible halos
- Work with developed files in **sRGB 16 bit** format

Third-party RAW converters

For instance **C1 (Capture One Pro)** combined with **Linear curve**, and **RPP (Raw Photo Processor)** with **Colorimetric Gamma** mode produces good results. You can also use any other RAW converter.

While processing RAW photos, we recommend:

- Correct the most severe deviations in exposure and white balance
- Use the Linear contrast curve if possible, avoiding clipping in shadows and highlights
- Disable noise reduction and sharpening
- Avoid any local contrast enhancement which might cause visible halos
- Export files in **sRGB TIFF 16 bit** format

Application path and user data location

Below you can find the main system paths of the installed application components and user data locations, which you may need when contacting support or maintaining the plug-in.

Installation (macOS)

Adobe Photoshop and Affinity Photo plugin:

/Library/Application Support/Adobe/Plug-Ins/CC/Dehancer

Adobe Lightroom and Capture One plugin:

/Applications/Dehancer Lightroom Plugin/Dehancer Lightroom Plugin.app

User Data (macOS)

Shared folder:

/Users/{user}/Library/Application Support/com.dehancer.film_shared

User Presets folder:

/Users/{user}/Library/Application Support/com.dehancer.film_shared/presets

Adobe Photoshop and Affinity Photo plugin log:

/Users/{user}/Library/Application Support/com.dehancer.film_shared/
dehancer_logs/photoshop_plugin.log

Adobe Lightroom and Capture One plugin log:

/Users/{user}/Library/Application Support/com.dehancer.film_shared/
dehancer_logs/lightroom_plugin.log

In macOS the user's **Library folder is hidden by default**.

You can access this folder in several ways:

1. Open **Finder**, click **Go** in the menu bar, and select **Go to Folder**. In the dialog box, type **~/Library** and click **Go**.
2. You can **unhide the Library folder permanently**. Open your **Home folder** (select your **username** in the **Finder** sidebar). Click **View** in the menu bar, and select **Show View Options**. Check the **Show Library Folder** checkbox.
