License Activation (removing the watermark)	7
Dehancer Updates	11
Downgrading the Plugin, Legacy Downloads	13
License Deactivation – IMPORTANT!	14
Uninstallation	15
Bug reports and feedback	16

System Requirements

Hardware requirements

- PC with Nvidia or AMD GPU
- CUDA or OpenCL compatible GPU

Known issues

- Vegas Pro does not support native access to GPU memory in plugins, resulting in lower performance compared to other hosts.

Software compatibility

- Windows 10 (64 bit), Windows 11 (64 bit),
Genuine licensed installation is required
- Vegas Pro 2026 and later (the plugin may work on earlier versions)

Estimated GPU memory consumption:

- FullHD – 4GB minimum / 8GB recommended
- 4K – 8GB / 12GB
- 6K – 12GB / 16GB
- 8K – 16GB / 24GB

Note: We do not officially support virtual machines, although some configurations are known to work. Operation with hacked or modified host applications is not guaranteed.

Downloading and installing the plugin

1. Make sure that your computer meets the **system requirements** for the plugin to work correctly.
2. Download the latest version of the plugin.
 - 2.1. Go to <https://www.dehancer.com/downloads>
 - 2.2. Select your host application and your product.
 - 2.3. Hit the **[Show]** button and download the installer file.
3. Unzip the downloaded zip, if your system didn't do it automatically.
4. Make sure that you host application is not running. Please, keep it closed until installation is complete.
5. **Run the compatible installer** and follow the installation steps:
 - **CUDA for Nvidia GPU**
 - **OpenCL for AMD GPU**
6. Restart Vegas.

Adding Dehancer to the Project

Before you start, you need to add Dehancer to the project. After that you will be able to perform the remaining steps of installation, downloading profiles and License Activation.

1. Select any clip on the timeline
2. Go to the **All Plugins** tab and find **Dehancer**.
3. Click the **+** button to add Dehancer to the Video Event FX chain.
4. **If you have multiple compatible GPUs, select the best performing one in the plugin Options → Render Device.**

Vegas allows to use Dehancer plugin in different workflows and color pipelines, please refer to the **Quick Guide** for more information.

Downloading Film and Camera Profiles

Before using Dehancer you have to **download film and camera profiles**.

1. Navigate to the bottom of the plugin settings and find the **Check Profiles** button. This allows you to download or update the profiles at any time.

2. Navigate to the bottom of Dehancer plugin settings, find the **Options** section and click the **Check profiles** button.

3. The Dehancer Profiles widget will open and the profiles will be downloaded and installed automatically.

Now Dehancer is ready to use.

License Activation (removing the watermark)

When the plugin is not activated:

- The watermark is applied to the preview and to the rendered footage
- The Lut Generator is disabled

To remove the watermark and to enable the Lut Generator tool, please activate the plugin. Notice that Lut Generator requires the FULL Dehancer Pro license or the Video & Photo Subscription and is not working with Dehancer Lite.

How to activate the plugin

1. Buy the Subscription or Lifetime plan on our website.

To buy the Subscription, go to <https://www.dehancer.com/pricing/> and select the desired plan.

After your purchase is complete, the notification will be sent to your email and your Subscription will be displayed in the User Profile.

Subscription plans for individuals include 3 independent seats that can be activated and deactivated within 3 different host applications.

Studio Subscription plan contains custom number of seats that are managed in the User Profile. Each seat can be activated on 1 workstation / device.

Lifetime plan contains 2 independent seats that can be activated and deactivated on 2 different devices.

2. Navigate to the bottom of Dehancer plugin interface, find the **Options** section and click the **License info** button.

3. The License widget will open. There are two main options available:

- **Login and select License (Online activation for Subscriptions and Lifetime plans)**
- **Production License (Offline activation for Production plans)**

Login and select License (Subscriptions and Lifetime plans)

The image shows a software window titled "License: Dehancer Pro". Inside the window, the Dehancer logo is displayed with the text "NOT ACTIVATED" in orange. A link for "License Features Chart" is in the top right. Below the logo, there are two tabs: "Login and select License" (which is active) and "Production License". Under the active tab, there are two input fields: "Registration E-mail:" and "Password:". At the bottom left is a "Close" button, and at the bottom right is a "Login" button.

1. Login with your Dehancer account.
2. You will be presented with a list of Licenses available for your product. Select a Seat from the list, then press **Activate plugin**.

Notice:

1. Internet connection is required for Activation.
2. **Don't forget to Deactivate from within the plugin interface before selling your computer, migrating or reinstalling the System.**

Production License (Production plans)

Production plan users get the activation data from the local Production Server.

If you just deactivated your seat and don't see the Production Licence tab, restart the Activation widget (close and reopen it from the plugin interface).

1. Enter your Production Server URL you've received from your admin or the license owner. Press **Login**.
2. After the activation is complete, close the widget and **restart Vegas Pro**.

Please don't forget to **DEACTIVATE** from within the plugin interface before selling your computer, migrating or reinstalling the system.

Dehancer Updates

We update the plugin regularly, adding new features, fixing bugs and improving performance. Keep Dehancer up-to-date to get the most out of it.

We recommend that you avoid updating both the plugin itself and the host application until you are finished working on the important projects.

Checking the Updates

Check the actual product version:

1. Go to <https://www.dehancer.com/downloads>
2. Select your host application and your product.
3. If the new version is out, download and install it manually.

We always announce new versions on social media and newsletters, so stay tuned.

Minor Updates and hotfixes

Minor update replaces the existing plugin installation, keeping the settings compatible and the current License Seat activated.

Generally, Dehancer settings in existing projects are not affected, but this depends on many factors, including host version, operating system and the entire processing chain. Thus, avoid updating the plugin while you are working on a project.

Major Updates

Major updates usually include new features and other changes that does not technically allow to maintain the plugin settings compatibility.

New major version will be installed as a separate, independent plugin. It will not be compatible with an old plugin node settings and requires separate License Activation.

You can use a spare Seat or just Deactivate an older version to re-use the existing License Key.

BETA Updates

- 1. Major BETA versions are installed as the separate plugins.**
- 2. Minor BETA versions will replace earlier releases.**

Generally the settings are not compatible with the stable release and the plugin requires separate License Activation. You can use a spare Seat or just Deactivate an older version to use the existing License Key for beta testing purposes.

Downgrading the Plugin, Legacy Downloads

Sometimes you may need to downgrade the plugin to the previous version for compatibility reasons. You can download the legacy distributive on the website:

[Download legacy installation packages for Vegas Pro OFX plugin](#)

Unpack and install the plugin as usual, the newer version will be replaced with the older one.

Attention! After the downgrade incompatible adjustments made with the newer version of the plugin may be lost.

License Deactivation – IMPORTANT!

Please don't forget to **DEACTIVATE YOUR LICENSE** from within the plugin interface **BEFORE** uninstalling the plugin, migrating your computer or reinstalling the OS.

To Deactivate any Dehancer plugin use the **'License Info'** button in the plugin interface, then press **'Deactivate'** and wait until deactivation is complete.

Uninstallation

How to Uninstall the plugin

1. **Deactivate the plugin** you are going to remove (use 'License Info' button inside the plugin, then press 'Deactivate').
2. Use the regular Windows uninstall procedure:
 - Go to **Control Panel** → **Programs** → **Programs and Features**
 - Press and hold (or right-click) on the plugin you want to remove and select **Uninstall** or **Uninstall/Change**

Bug reports and feedback

Please complete this checklist before requesting support:

1. Make sure that your computer meets the **system requirements** for the plugin to work correctly.
2. Install the latest version of Dehancer plugin. Please, check the actual product at the dehancer.com.

If you still encounter any issues, send bug report via this support form:

<https://www.dehancer.com/support>

Please provide the following information:

1. Detailed error description
2. Detailed System Information
3. Vegas Pro and Dehancer versions
4. Also we need several from your project along with a short fragment from the source video.
